Danny Way's Giant graphic is often thought of as his first Pro Model but it's actually his second, after the Rabbit in the Hat. It was originally released on the Hell Concave in the same shape as the rabbit.

We are now re-issuing this classic design on the original shape with the old school hole pattern on the Hell Concave, as well as on an updated rider shape with the standard hole pattern on the Supreme Concave.

The rider edition is perfect for all modern Park&Pool riding, all-around cruising and vert ramps.

Each edition comes in several colors ways and finishes.
