ProTecta Skate Lubricant

**Makes All Other
Skate Lubricants
Obsolete!**

**“One of the finest
Skate Lubricants ever made”**

- One Drop of ProTecta Skate Lubricant can withstand 80,000 pounds of pressure! So no matter how hard you skate, ProTecta will maintain a film of lubricant even under the most extreme pressure.
- If you are looking for incredibly smooth operation and greater bearing life then look no further!
- The needle stick applicator allows you to place one drop exactly where you want it. No need to clean up the excess!
- With a temperature range from -50 to $+300$ °C you will get all season protection. No longer will your bearings be sluggish on those cold winter mornings or weeping lubricant on a hot day in the tropics!
- You can use ProTecta Skate Lubricant with complete confidence as its advanced synthetic formula won't swell rubbers or cause plastics to perish
- It is light enough to use when your bearings are still on your board but it also has an incredible desire to cling to metal making it great to use when you strip down your bearings—Old or New. One versatile product!
- ProTecta will resist wash off and facilitate corrosion prevention.
- Its handy size allows you to take it with you, making it easy to access both when you are out skating and at home.
- Don't just use it on you skate bearings! It can also thousands of other uses around the shed and house
- Don't short change yourself, use what the best skaters and skate shops recommend; ProTecta Skate Lubricant!
